PT Indika Energy Tbk.

Jakarta, October 31, 2026

Indika Energy – Energizing Indonesia for a Sustainable Future

- ✓ An Investment Holding Company with portfolio spanning across Indonesia, from energy resources, logistic and infrastructure, minerals as well as green business.
- ✓ Well-placed to capture domestic economic growth and global economic recovery
- ✓ Provides complementary products and services to domestic and international customers
- ✓ Strong operating track-record, with focus on cost control and unlocking synergies within the Group
- ✓ Ongoing diversification initiatives such as gold mining, renewables, EVs and digital technologies (target 50% non-coal revenue by 2028)
- ✓ Strong focus on and commitment to ESG initiatives
- ✓ Prudent financial management, with established track record in debt and equity capital markets

Energy

Resources

- Indonesia's 3rd largest coal miner(1)
- Coal exploration and production through flagship Kideco
- Coal trading (ICI and IETPL)

KIDECO INDIKA TRADING

Services

- EPC and O&M services in oil & gas and power generation (Tripatra)

tripatra

Infrastructure

- Transportation of bulk materials (SBS & CTA)
- Electricity generation (CEP/CEPR)

CIREBON POWER

Logistic & Infrastructure

- Port and logistics services, as well as fuel storage (Interport)

interport

Minerals

- Gold development Project
- Nickel Trading
- Bauxite Mining

PT MASMINDO DWI AREA

MEKKO METAL MINING

Green Business

- Renewables energy through solar power
- Electric Vehicle, 2W and 4W
- Nature based solutions

EMiTS Indika Nature ALVA inVi KALISTA

Digital Ventures

- Digital technology activities (integration of Group ICT systems)
- Digital transformation and analytics

XAPIENS

(1) *As measured by 2019 production according to Wood Mackenzie*

Indika Energy has set out bold aspirations as part of its ESG commitment

50%

non-coal revenue by 2028

Net-Zero

emissions by 2050

Notable green initiatives:

- A leading Indonesian Investment group
- One of the 1st Indonesian company to commit to a Net Zero target, with the goal of >50% revenue from non-coal by 2028
- One of the 1st Indonesian investment groups to enter EV

Thermal Coal Price (2024 – Mar 2026, US$/t)

- The U.S.–Iran conflict and the closure of the Strait of Hormuz have contributed to higher coal prices, which have increased ICI-4 by more than 45% compared to pre-war levels.
- Q4 demand remains positive, supported by tight LNG supply (Asian LNG above $20/MMBtu), oil prices supporting freight and mining costs. Seasonal demand is also supported by post-monsoon Indian restocking, NEA winter procurement, and utility inventory rebuilding.
- Daqin Railway, the key rail link transporting coal from major production regions to Qinhuangdao Port, will undergo autumn maintenance from 7–26 October. Daily handling capacity could decline to ~1.0 Mt from 1.25 Mt capacity, potentially lowering port inventories and prompting coastal power plants to rely more on imports
- Coal's continued cost advantage over gas, combined with tighter gas supply following the damage to Qatari facilities, could make it harder for Japan and South Korea to reduce their reliance on coal as quickly as planned.

Diversification Investments – Minerals

Developing Gold Asset Project through Masmindo (Awakmas)

Infrastructure:

- Luwu Regency, South Sulawesi
- Project located 45 km from coast
- Good access to roads, two ports, airport, and telecommunication
- Project to be powered by grid power

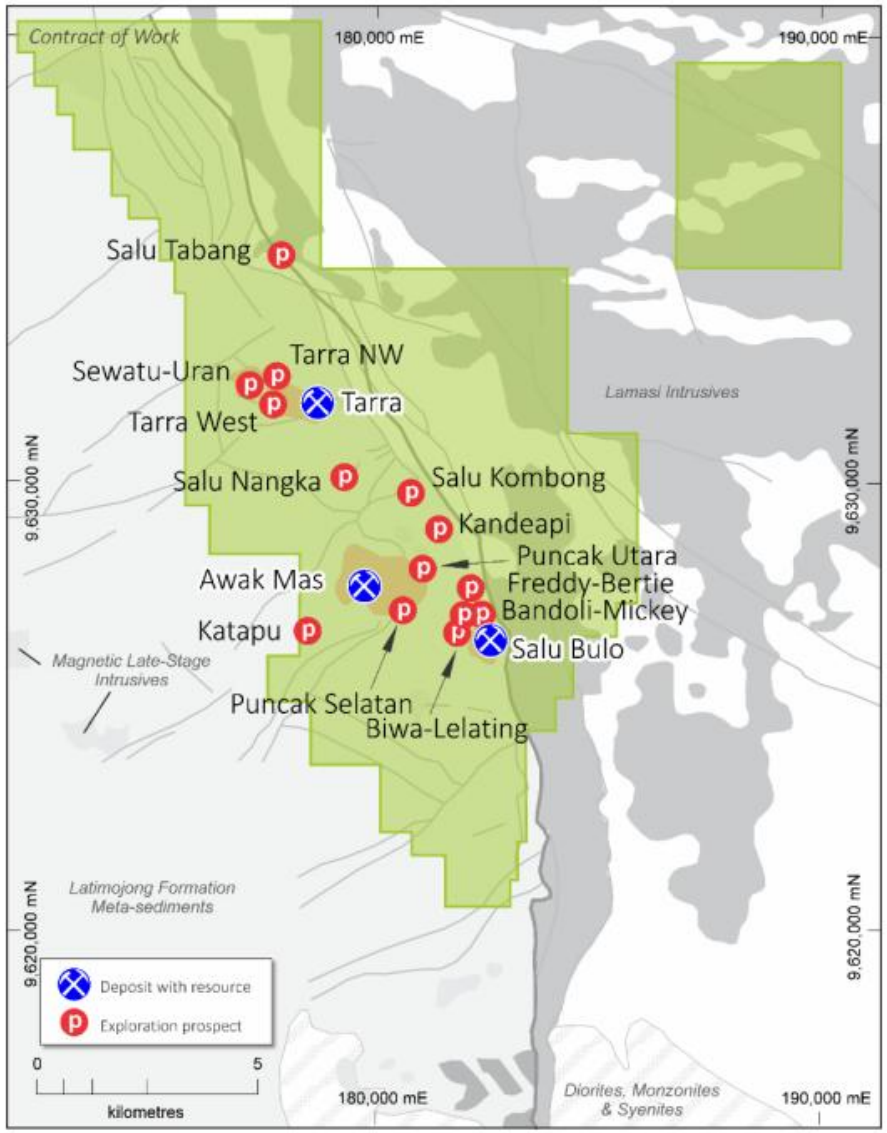

Concession :

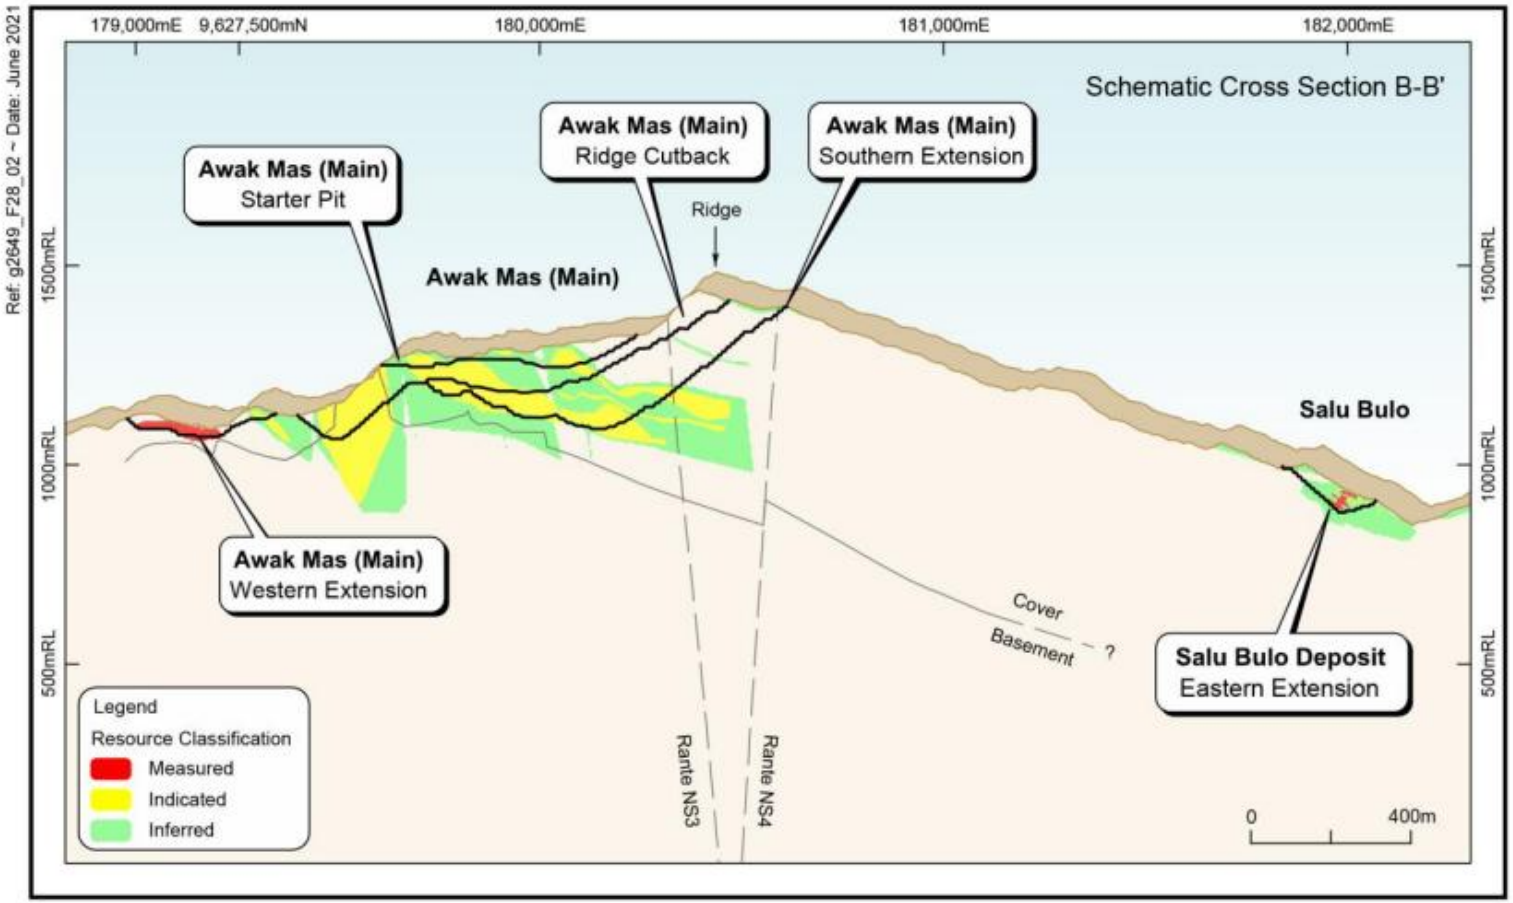

- Total concession area 14,390 ha — non-forestry land
- Development Area: 1,440 ha or 10% of total concession
- AMDAL (EIS) approved
- CoW tenure secured to 2050, with extensions possible as IUPK title system to 2070.

Diversification Investments – Minerals

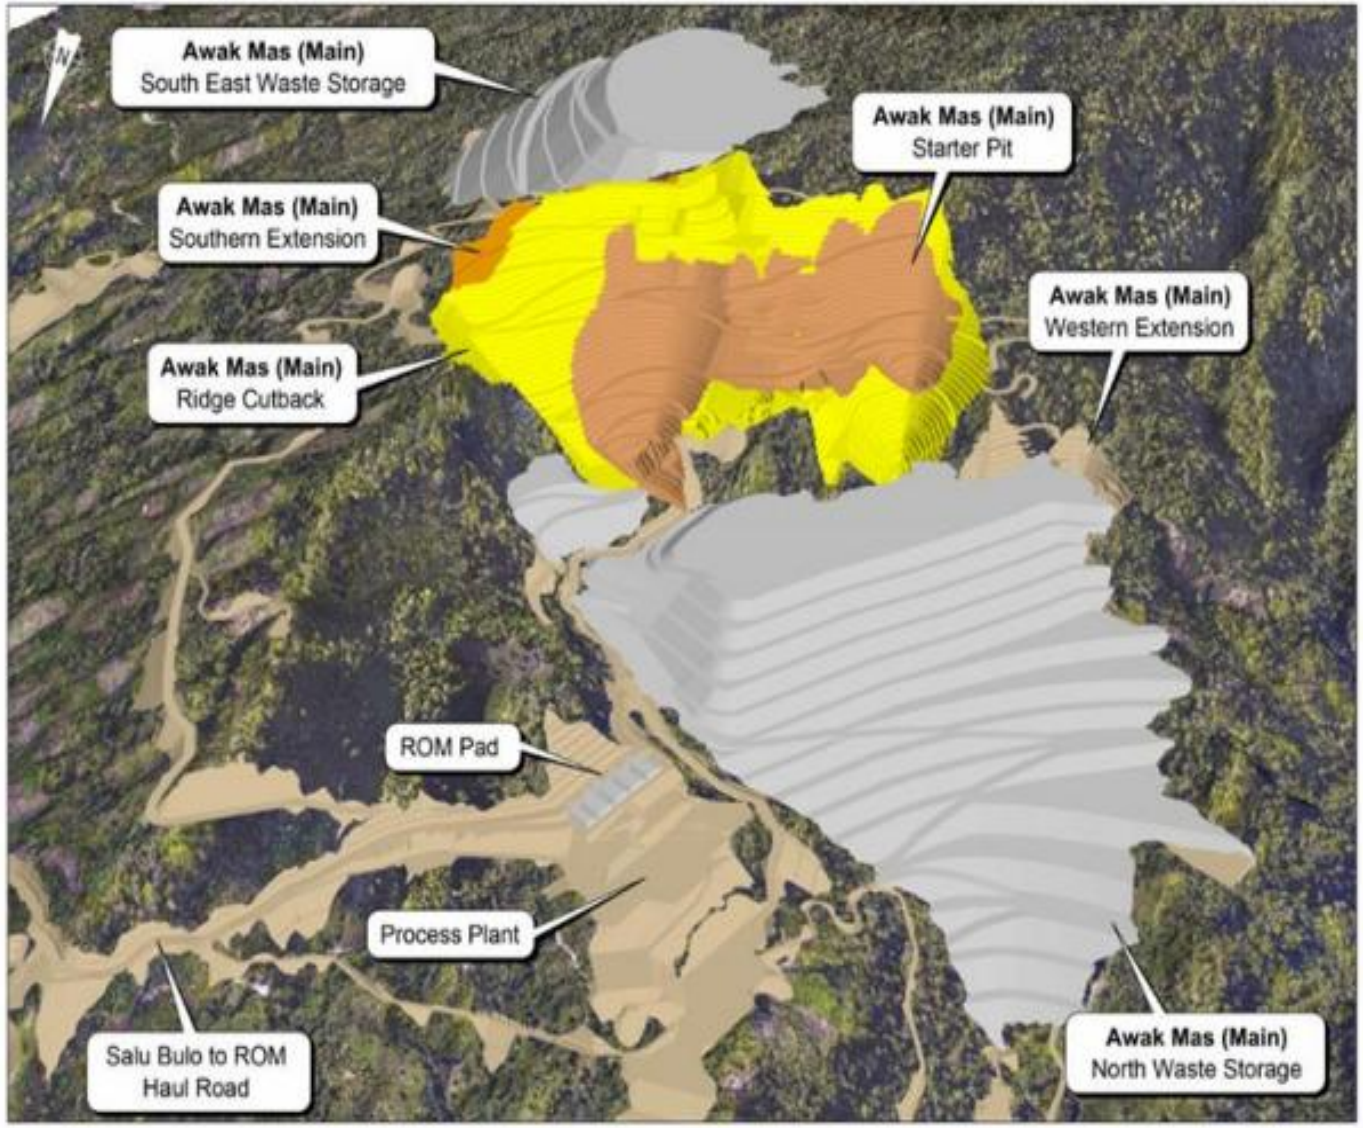

Large concession area – currently only 10% being developed

Awak Mas Gold Project – Contract of Work

Diversification Investments – Minerals

Awak Mas (main) pit

Awak Mas Project

- Gold ore reserve of 1.9 Moz and gold ore resources of 3.29 Moz (based on latest reserve report February 2026 by Mining One)
- Open pit mining with drilling and blasting
- Has signed refinancing agreement with total funding of US$375 million from consortium banks
- Appointed Macmahon Holding Ltd as the mining service contractor for A$463m contract for a period of 7 years, with option to extend for 5 years.

Green Business - Aims to accelerate Indonesia's EV ecosystem

Kalista - Developing trials for a fleet-as-a-service model, working with local governments and bus operators

About Kalista's FaaS model

The fleet-as-a-service business model enables governments, public, and private businesses to accelerate the EV transition in Indonesia through

- Separating ownership and maintenance from the fleet operator
- Allowing for monthly rental terms, negating the high capital expenses of EV purchasing
- Providing a wide array of vehicle options to suit a variety of local needs (e.g., high buses, low buses, LCVs, Angkots)

Kalista's operation and trials with local governments

Kalista - To accelerate adoption of EV in Indonesia

As a Fleet-as-a-Service provider, KALISTA owns and leases a range of EV assets, including electric buses and motorcycles, as well as charging infrastructure

Data as per 30 Sep 2026

Kalista - To accelerate adoption of EV in Indonesia

- To separate between ownership and maintenance from operator
- Usage based on monthly rental, to ease burden of CAPEX
- Has conducted trials for public transport services in 6 major cities across Indonesia
- Currently operate 87 units commercially in Jakarta and Medan

- Developing fleet-as-service model to accelerate transition to EV, through B2B, B2G as well as public
- Current segment target include logistic, mining and plantation, as well as local government and bus operator
- To provide wide array of vehicles in terms of size and capacity, addressing customers' needs

IMG launched its brand “ALVA” with its own manufacturing facilities and builds experience center

Manufacturing Facilities

Key Highlights

- Fully operational manufacturing facilities located in Kawasan Industri Lippo Cikarang (Delta Silikon 6) on area of 1.7 hectares
- Already in mass production since Nov 2022
- Total capacity of 100,000 units per annum (with all shifts). Implementing flexible manufacturing & Industry 4.0 technology to enable fast scale up 36,000 to 100,000 units per annum

The E2W market in Indonesia is expected to grow steadily, with the premium and mid-range segments gaining momentum

- ALVA has launched the ALVA One and CERVO models (premium segment) and completed the first delivery of the ALVA N3 (mid-range segment) in late April 2025.
- The share of B2B sales has shown strong growth, supported by increasing customer acceptance driven by a lower total cost of ownership (TCO) compared to ICE motorcycles.
- ALVA now operates more than 130 fast-charging connectors at strategic locations across Indonesia, addressing range anxiety concerns (charging takes less than 30 minutes to reach 50%).
- ALVA currently has 21 Points of Sales (POS) and over 40 service points, including 11 ALVA Experience Centers and more than 10 affiliated partner locations.
- ALVA has also introduced “ALVA Bebas,” a battery subscription program for the ALVA N3 electric motorcycle, which enhances affordability. The program includes a lifetime battery warranty and a monthly battery rental fee of IDR 250,000.

IMG already introduced 5 ALVA products

Launched a new model in Mid segment “ALVA N3”

- ALVA introduced a new model in mid-segment called ALVA N3
- Pricing is competitive compared to market
- N3 already adopts boost-charge technology in its battery, capable for 1-hour fast charging

Diversification Investments – Green Businesses

Indika Nature – Biomass, Agroforestry, Carbon Offset

Indika Nature

Energy Plantation

- Designated for planting Calliandra trees to produce wood pellets., planting at 5,000 ha area in Jaya Bumi Paser, East Kalimantan.
- Securing customers from Japan and South Korea

Environment Services

- Process of obtaining a carbon credit certificate that can be used for carbon offsets for the Group or can be sold to third parties

Agroforestry & Non-Timber Forest Product

- Develop agricultural products that sequester carbon in biomass, soils, essential oils and energy usage on farms

❑ Since its inception in 2019, Indika Nature currently owns 3 asset companies with various forestry licenses and a total of 135 thousands ha area under its management

Indika Nature – Expanding to essential oil business

Indika Nature acquired 100% shares in PT Natura Aromatik Nusantara

NATURA AROMATIK

An essential oil producer with the fourth largest exporter in Indonesia located in Solo, Central Java

Sector attractiveness due to its traditionality and fragmented players - opportunity to become significant player in the sector

Abundant resources in Indonesia - to supply 70% cloves derivative and 80% patchouli worldwide

Synergy within the group – Indika Nature sizeable land bank could leverage expansion on end-to-end value chain, and could improve our campaign for Net Zero, ESG traceability

Natura offers established network for Flavor & Fragrance customers – Natura will act as trading company for Indika Nature products (supply sustainability to secure long-term contract with the customers) and potentially penetrate the downstream local market

Products

Aroma Chemical

Natural and synthetic aroma compound derived from clove leaves	Eugenol, Rectified Clove Leaf Oil, Clove Terpenes, Caryophyllene Isoeugenol, Methyl Eugenol, Methyl Isoeugenol, Eugenyl, Acetate, Isoeugenyl Acetate

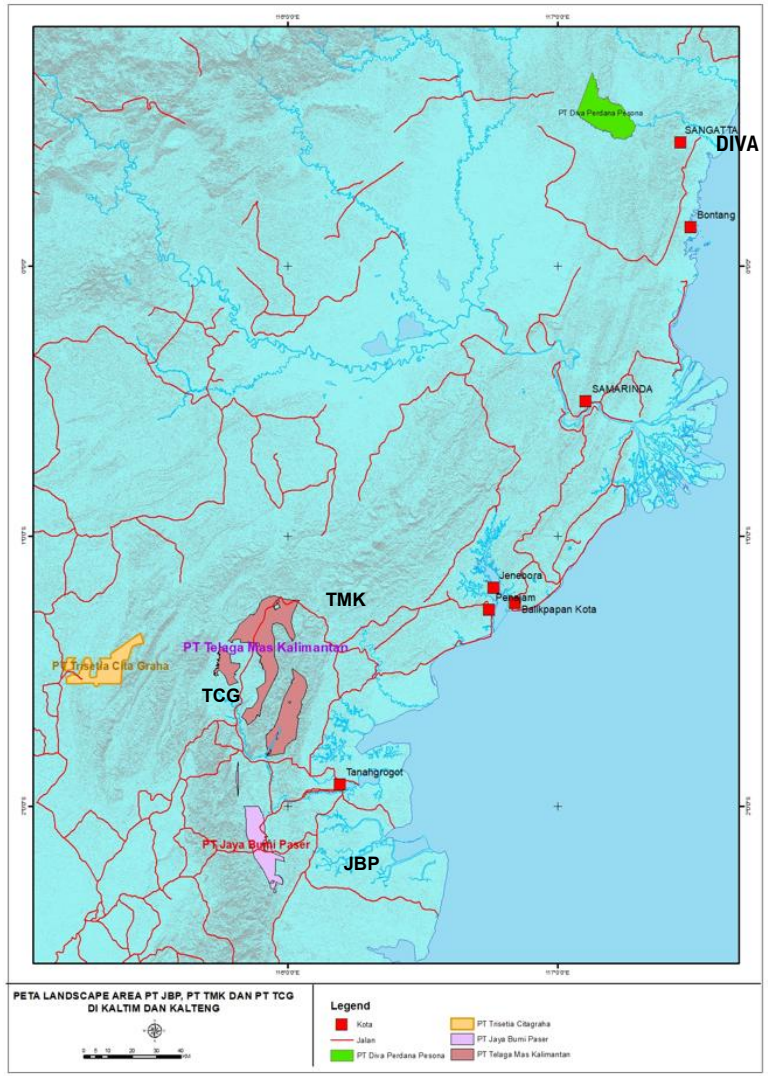

Essential Oil

Concentrated natural oil obtained by distillation, having the characteristic fragrance of the source plant or fruit	Clove Leaf Oil, Clove Bud Oil, Clove Stem Oil, Patchouli Oil, Citronella Oil, Nutmeg Oil, Vetiver Oil, Cananga Oil

Natural Extract

Substance with desirable properties that is removed from the tissue of a plant	Ginger Extract, Curcuma Extract, Turmeric Extract, Garlic Extract, Eucalyptus Extract, Tamarind Extract, Cocoa Extract, Coffee Extract

Indika Nature – Biomass Energy to produce wood pellet

Indika Nature

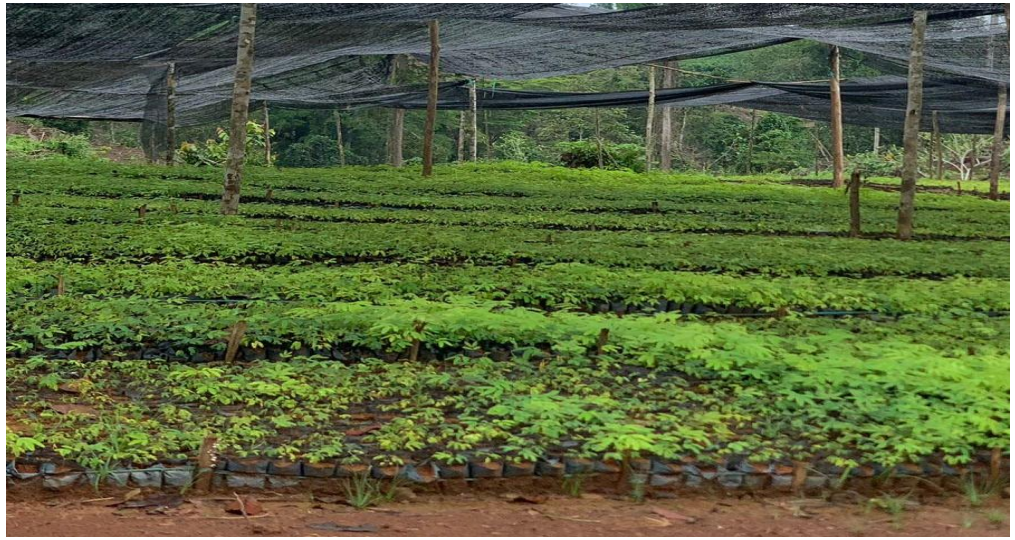

Jaya Bumi Paser
23,590 Ha
East Kalimantan

Diva Perdana Pesona
29,485 Ha
East Kalimantan

- Currently in phase I with total planting of 5,000 ha
- With average calorific value of 4,200–4,750 kcal/kg, wood pellet is suitable for biomass power plant/ co-firing
- Already received FSC certification in January 2024

Indika Nature – Carbon Business at TMK to support Net Zero Target

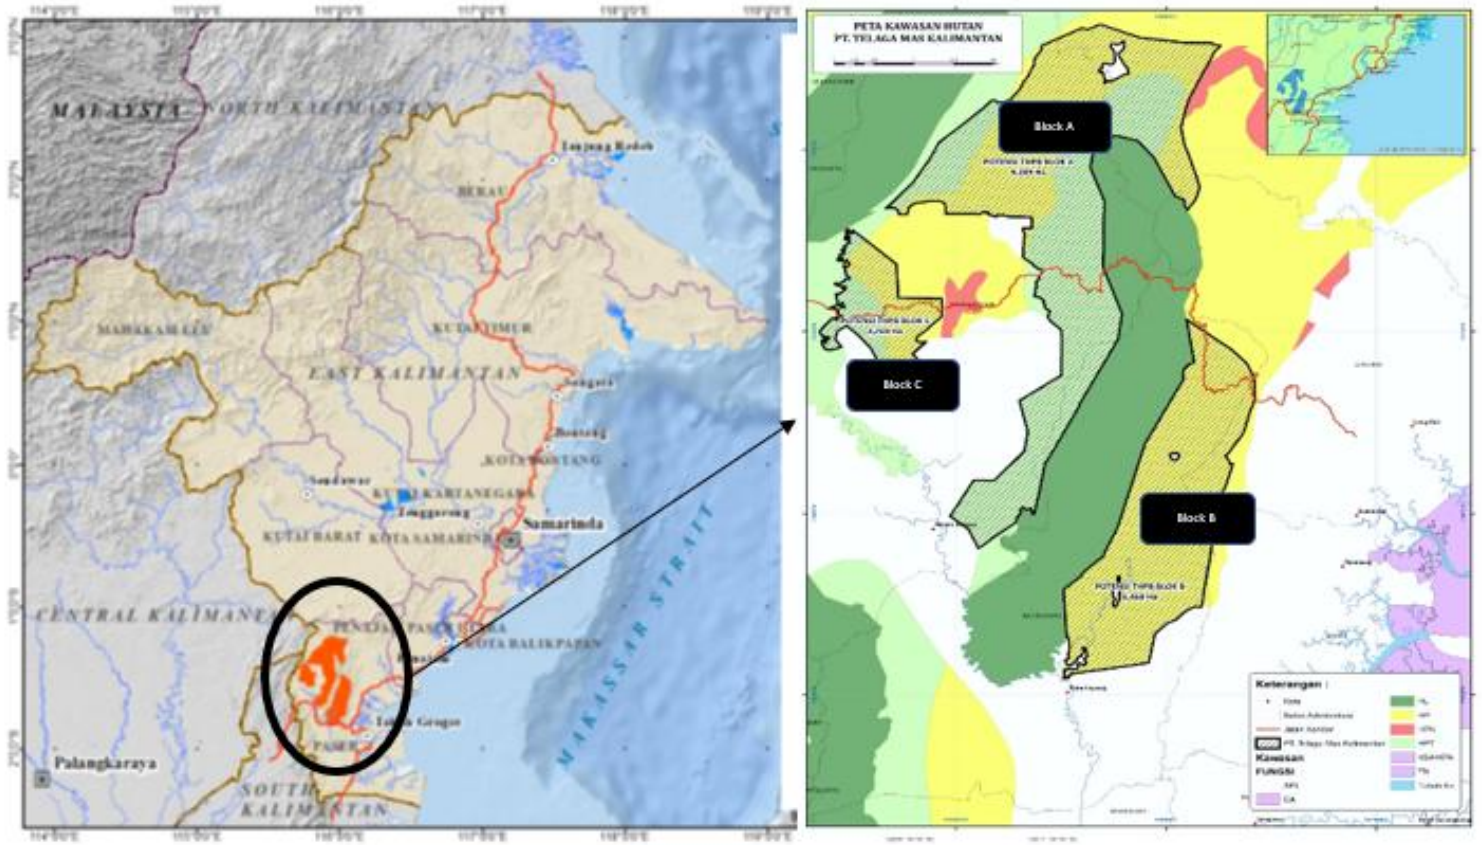

Project Overview

- PT Telaga Mas Kalimantan (TMK) is the holder of Forest Concession Rights (IUPHHK-HA (now PBPH) with an area of 82,805 ha, located in Paser Regency, E. Kalimantan
- The area is dominated by Meranti trees (50%), Rimba Campuran (26%) and other woods.

Status

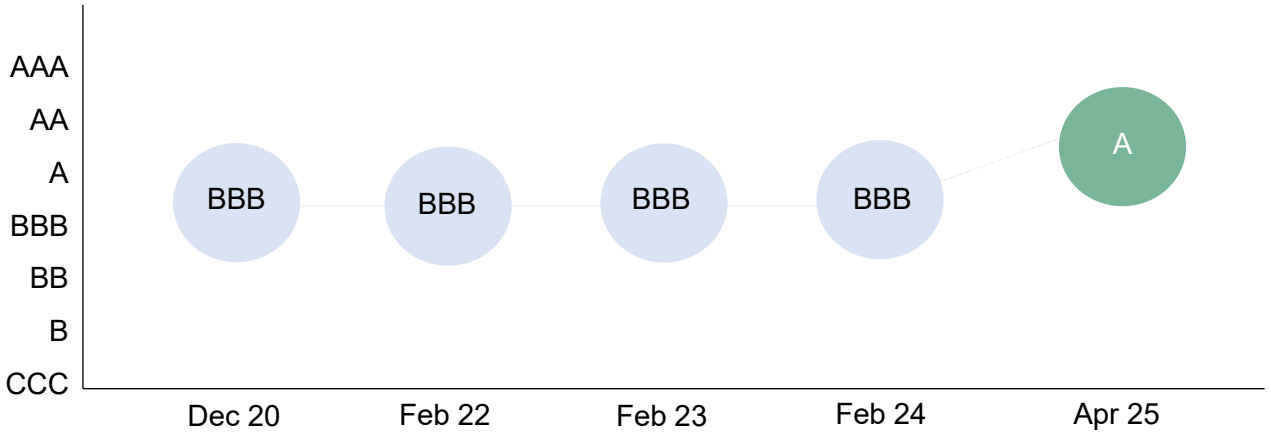

- Originally TMK was wood logging concession, with 82,805Ha with total net exploitable wood about 2 million m3.
- Baseline & potential carbon volume study by Hatfield Consultant, (2021) and
- Feasibility study TMK carbon project continued by Wildlife Works Consultant (2021)
- Feasibility study and PDD TMK carbon project conducted by PT WAS (2022-present).
- Improved Forest Management: Conversion from Logged to Protected Forest, VCS Methodology VM0010, Version 1.3 Sectoral Scope 14
- According to WAS, during the 30-year crediting period, project area (only TMK area) could produce 19.2m VCUs, equivalent to 641k VCU credits annually.
- Currently is in the process to be certified through SPE GRK, with estimate average volume of 797kT CO2e/year for 25-year project.

MSCI

MSCI ESG score

2025 score: A (previously BBB)

Indika Energy's MSCI ESG Rating has been upgraded from BBB to A, reflecting continued progress in strengthening our sustainability performance and risk management practices. The improvement was supported by stronger performance in carbon emissions, water stress, and toxic emissions and waste, with these areas now scoring above the industry average. This recognition reinforces the Group's ongoing efforts to embed ESG considerations into our operations and business strategy, while strengthening our resilience and long-term value creation for investors and other stakeholders.

MSCI ESG rating scale:
AAA | AA | A | BBB | BB | B | CCC

ESG performance – 9M26 vs 2026 target

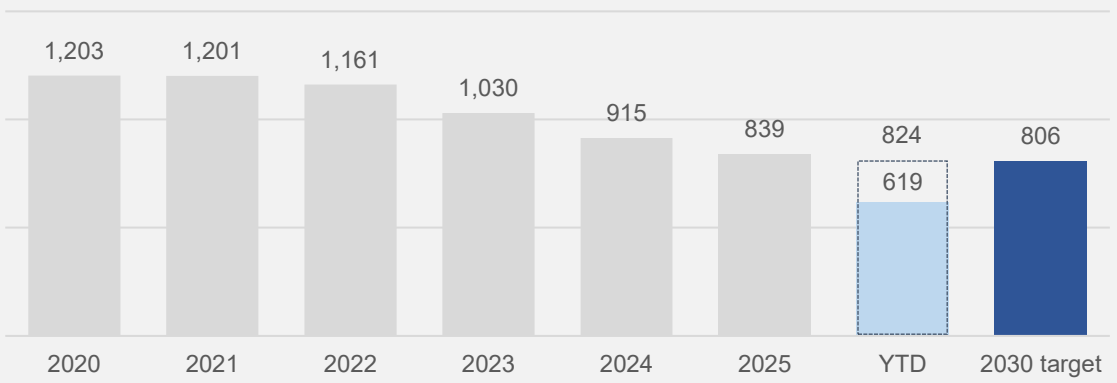

Beyond tracking progress against our 2026 milestones, we regularly assess our performance and identify areas for improvement to ensure we remain on track toward achieving our 2030 mid-term sustainability targets. This approach enables us to monitor progress, address potential gaps, and maintain momentum toward our longer-term sustainability ambitions.

9M 2026 – Environmental Performance

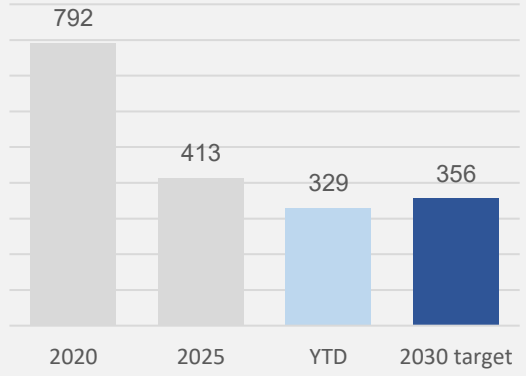

Scope 1 and 2 GHG emissions
ktCO2eq

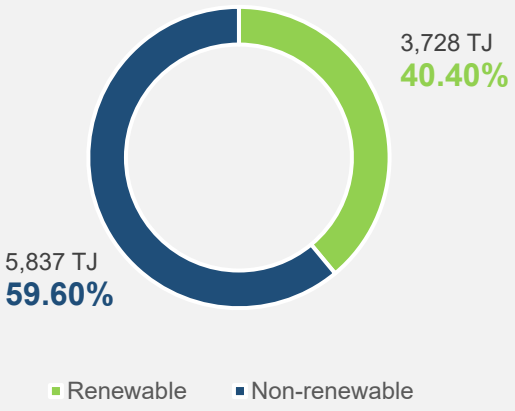

GHG emissions intensity
tCO2eq / ton coal production

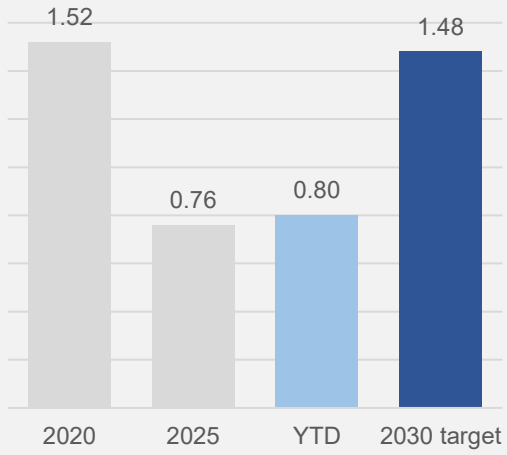

GHG emissions intensity
tCO2eq / million USD revenue

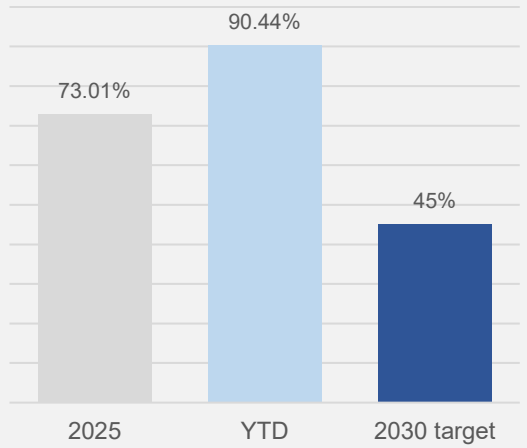

Renewable energy share
%

Water withdrawal intensity
megaliters/ million USD revenue

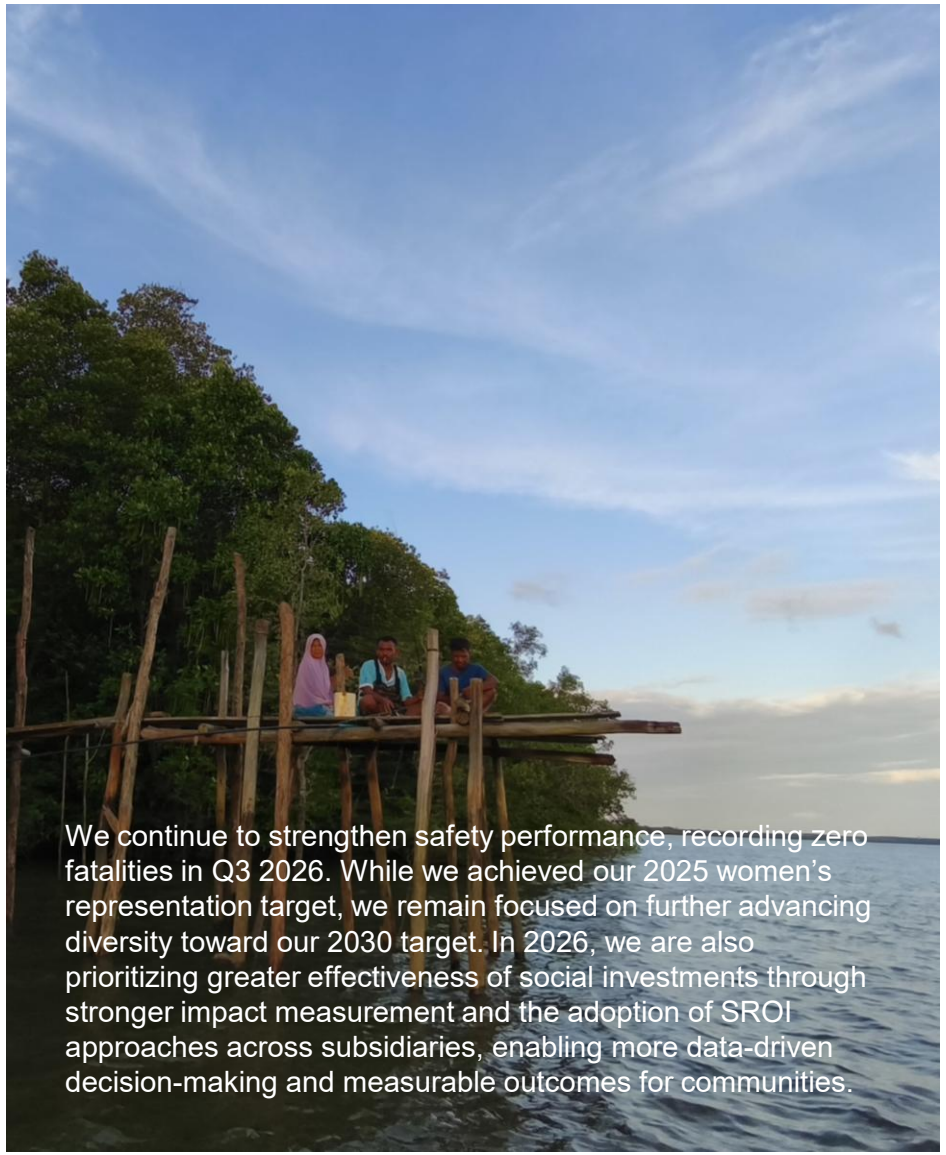

Non-hazardous waste diversion rate
%

Year-to-date Scope 1 and 2 emissions reached 619 ktCO2e, with a full-year projection of about 824 ktCO2e. That is on track toward our 2030 target of 806 ktCO2e. Renewable energy share increased to 40.40%, already exceeding the 2030 target of 35%. This was driven by B50 use at Masmindo and Mekko, while other subsidiaries remain on B40.

Meanwhile, water withdrawal intensity rose to 0.80 ML/million USD (from 0.76), driven by dry-season reliance on alternative water sources at Kideco and other sites, and by expanding operations at Masmindo, but it remains within the 2030 threshold of 1.48.

9M 2026 – Social Performance

We continue to strengthen safety performance, recording zero fatalities in Q3 2026. While we achieved our 2025 women's representation target, we remain focused on further advancing diversity toward our 2030 target. In 2026, we are also prioritizing greater effectiveness of social investments through stronger impact measurement and the adoption of SROI approaches across subsidiaries, enabling more data-driven decision-making and measurable outcomes for communities.

Community development
%, lives, and IDR million

2.32%
Community development spending as a percentage of EBIT. A total of IDR 50,111 million was spent on community development, benefiting 182,065 people through our social programs.

INDIKA ENERGY | NET-ZERO 2050

INITIATIVES HIGHLIGHT

Eco-Innovation in Mining: EV Dump Truck

The use of EV Dump Trucks (Sany EV 342) at Kideco reduces carbon emissions and noise pollution, enhances cost efficiency through cheaper electric energy, and lowers maintenance needs. Regenerative braking boosts productivity, aligning with Indika Energy's sustainability goals and carbon emission compliance.

~28%
Estimated carbon emission reduction from switching from fuel to electricity

~55%
Estimated cost savings from switching from fuel to electricity

Lower
maintenance requirements and reduced noise pollution

We strengthened transparency through enhanced sustainability disclosures while expanding our ESG network and industry engagement

United Nations Global Compact

The UN Global Compact is a conviction rooted in universal principles to help the global marketplace to be more socially and economically inclusive. We declare our commitment to uphold the UNGC Ten Principles in the areas of human rights, labor, environment, anti-corruption.

Powering PastCoal Alliance

In one of the strongest demonstrations to date of Indika Energy's commitment to transitioning toward a low-carbon business path, we are proud to be the first, and to date only, Indonesian company that is a member of the Powering Past Coal Alliance (PPCA).

ibcsd

Indonesia Business Council for Sustainable Development (IBCSD) is a CEO-led association of companies in Indonesia that share the commitment to promote sustainable development through economic growth, ecological balance, and social progress.

WORLD ECONOMIC FORUM

As businesses across the energy industry face growing expectations to drive sustainable growth while reducing climate impact and strengthening social value, we are committed to building a more prosperous society and sustainable relationship with our planet. As part of this commitment, we have adopted the World Economic Forum's (WEF) Stakeholder Capitalism Metrics (SCM) in our ESG reporting.

Global Reporting Initiative (GRI) Standards

Indika Energy's Sustainability Report is presented in accordance with GRI (Global Reporting Initiative) Standards 2021

United Nations SDGs

The UN SDGs is a collection of 17 interlinked objectives that serve as a guiding principle in mapping ESG, sustainability strategies, and initiatives to support the sustainable development of their businesses and host governments.

SEOJK NO: 16/2021

Indika Energy also comply with SEOJK No. 16/2021, the Indonesian financial services authority standard for sustainability reporting

ESG Assurance

We strengthen the credibility and transparency of our ESG disclosures through an independent assurance process conducted by leading certification and assurance providers. This process helps validate the accuracy, reliability, and completeness of our reported ESG data, reinforcing stakeholder confidence in the quality of our sustainability reporting and our commitment to robust reporting standards.
